

Genexis FiberTwist

FiberTwist Stand

Allowing for desktop installations for the
FiberTwist 6000 Series

Discover the perfect solution for brownfield scenarios that don't quite fit the traditional wall-mounting approach, such as metering cabinets installations. In these situations flexibility and connectivity are essential. Meet the FiberTwist stand. This innovative stand allows end-users to position the FiberTwist 6000-Series exactly where they need it. Ensuring that you can make the most of your network setup.

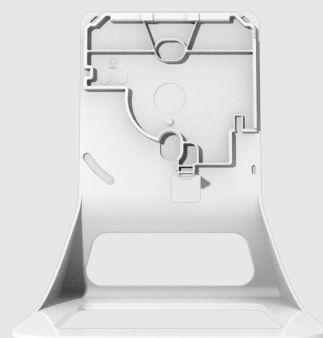

Designed with style and stability in mind, it's the ideal choice for desktop installations. With its user-friendly, do-it-yourself assembly, end-users can have it up and running effortlessly. Whether upgrading an existing network or establishing a new one, the FiberTwist Stand offers a sleek and stable solution that adapts to end-users needs, ensuring the FiberTwist performs at its best in any environment.
